1. About this report

Cyber Essentials Plus is the audited version of the Cyber Essentials information security standard. Cyber Essentials requires organisations to have a number of technical and procedural controls in place to improve their information security in order to mitigate common internet-borne cyber attacks. Cyber Essentials Plus is a series of tests that provide a further level of assurance that these technical controls have been successfully implemented within an organisation.

This report is a record of the Cyber Essentials Plus audit of IMeasureU Limited (UK)/IMeasureU Inc (US)/ImeasureU Limited (NZ)/Vicon Motion Systems Inc (US)/Vicon Motion Systems Limited (UK) against the Cyber Essentials standard that has been carried out by Ryan Greenhalgh of the Certifying Body Lawyer Checker.

Cyber Essentials provides assurance that a number of key information security controls are in place within an organisation. For further assurance, the IASME information security standard provides a broader set of controls that enable good information security governance across an organisation.

1.1. Summary of findings

External vulnerability scans did not show any high risk or critical vulnerabilities. A credentialed patch audit taking a sample from a server and office devices did reveal some high risk and critical vulnerabilities mostly relating to missing updates. These vulnerabilities have since been patched and this has been verified. Antimalware testing did not raise any issues. All test results met the requirements for Cyber Essentials PLUS.

The assessor has concluded that IMeasureU Limited (UK)/IMeasureU Inc (US)/ImeasureU Limited (NZ)/Vicon Motion Systems Inc (US)/Vicon Motion Systems Limited (UK) has passed the required tests and should be awarded the Cyber Essentials Plus certification.

If a test has not been passed successfully, the assessor has provided feedback within the relevant section.

1.2. Evidence of activities

In carrying out the audit, the assessor will have carried out a number of technical tests and have seen documentary evidence. This evidence forms the basis for the assessor's recommendations and where appropriate has been included in this report.

2. Scope

Oxford - Head Office
Main Network Denver
Main Network LA
Main network Auckland
External IP Range - 87.224.10.16/28
Internal IP Range - 172.16.100.0/23

Certain items will be out of scope for the Cyber Essentials Plus assessment. Notable exceptions are listed below:

N/A

3. External Testing

3.1. Test 1 – Remote vulnerability assessment

This test was awarded **PASS** by the assessor.

The test did not identify any vulnerabilities that were scored 7 or higher on CVSS v3 during the testing of the external IP addresses.

4. Internal testing

A suitable sample set of devices was selected as follows:

Vicon has 32 Windows 10 desktops, 57 Windows 10 laptops, 1 ubuntu desktop, 8 MacBook's, 3 Microsoft Windows Server 2012 R2, 4 Windows Server 2016, 43 ubuntu servers, 17 iOS Mobiles, 5 Android devices. The sample picked was 4 Windows 10 desktops, 4 Windows 10 laptops, 3 MacBook's, 1 Windows Server 2012 R2, 3 iPhones, 2 Android Devices. The ubuntu instances and the other Windows Server instances were not included as they do not allow users access to a desktop environment.

4.1. Test 2 – Review of device patching

This test was awarded **PASS** by the assessor.

No vulnerabilities were identified for the tested devices that were scored 7 or higher on CVSS v3 and that met the parameters listed in the Cyber Essentials Plus guidance.

4.2. Test 3 – Review of malware protection

This test was awarded **PASS** by the assessor.

It was identified that IMeasureU Limited (UK)/IMeasureU Inc (US)/ImeasureU Limited (NZ)/Vicon Motion Systems Inc (US)/Vicon Motion Systems Limited (UK) is using the following methods of malware protection in their organisation:

- A - Anti-malware software
- B - Limiting installation of applications to an approved set
- C - Application sandboxing

A - Anti-malware software

Anti-malware software is correctly installed and configured on all devices that rely on this method

B - Limiting installation of applications to an approved set

This method of anti-malware protection is correctly configured on all devices that rely on it.

C - Application sandboxing

This method of anti-malware protection is correctly configured on all devices that rely on it.

4.3. Test 4 – Review of protection against malware sent by email

This test was awarded **PASS** by the assessor.

The standard set of test files was sent to each End User Device in the sample set via email.

All of the malware test files were successfully blocked by the End User Devices.

All of the non-malware test files prompted a suitable warning or opportunity to cancel before opening for all End User Devices.

4.4. Test 5 – Review of protection against malware delivered through a website

This test was awarded **PASS** by the assessor.

The standard set of test files was attempted to be accessed via a website on all End User Devices within the sample set.

All of the malware test files were successfully blocked by the End User Devices.

All of the non-malware test files prompted a suitable warning or opportunity to cancel before opening for all End User Devices.
