

Vicon Nexus User Guide

About this guide

This guide contains instructions on using Vicon Nexus. It explains configuring your Vicon system within Nexus and the basic tasks that make up the everyday Nexus workflow. It assumes you have already installed and licensed Nexus and set up your Vicon system hardware. If you need information about these procedures, see [Installing and licensing Vicon Nexus](#) and/or the Vicon documentation that was supplied with your Vicon hardware, or contact [Vicon Support](#).

Videos of many of the procedures described in this guide, including many additional tips and examples, are available from the [Vicon Nexus 2 Tutorials playlist](#) on YouTube, beginning with system calibration.

Note

As the videos were recorded using an earlier version of Nexus 2, you may notice small differences in the user interface.

For additional documentation related to Nexus (for example *PC Setup for Vicon Systems*) and other Vicon documents, visit the [Downloads page of the Vicon website](#).
