

Plug-in Gait models and templates

The following topics contain information on the differences between the Plug-in Gait models, including details of the relevant outputs and marker sets. A description of the labeling skeleton templates that you can use with Plug-in Gait is also available:

- [Lower body modeling with Plug-in Gait](#)
- [Upper body modeling with Plug-in Gait](#)
- [Full body modeling with Plug-in Gait](#)
- [Plug-in Gait labeling skeleton templates \(VSTs\) in Vicon Nexus](#)

If you are using Plug-in Gait for gait analysis, the precision of the marker placement is critical for obtaining accurate clinical results. Use the information and illustrations in the above topics to place markers on the patient.
