

Vicon Nexus User Guide

About this guide

This guide contains instructions for using Vicon Nexus. It explains configuring your Vicon system within Nexus and the basic tasks that make up the everyday Nexus workflow. It assumes you have already installed and licensed Nexus and set up your Vicon system hardware. If you need information about these procedures, see [Installing and licensing Vicon Nexus](#) and/or the Vicon documentation that was supplied with your hardware, or for help with how to connect up your Vicon system, see [Vicon system setup information](#). You can also contact [Vicon Support](#).

 Videos of many of the procedures described in this guide, including additional tips and examples, are available from the [Nexus 2 How To playlist](#) and the [Vicon Nexus 2 Tutorials playlist](#) on YouTube, beginning with system calibration.

Note

As the videos were recorded using an earlier version of Nexus 2, you may notice small differences in the user interface.
